Darjan Drugarinović

Software Engineer · 5 Years' Experience

darjan.drugarinovic@gmail.com 060 7154400 Niš, Serbia

Education

Master's Degree in Computer Software Engineering
Faculty of Electronic Engineering, University of Niš — GPA: 10/10

Bachelor's Degree in Computer Science
Faculty of Electronic Engineering, University of Niš — GPA: 8.5/10

Work Experience

Software Engineer — Ascalab

July 2024 – Present

myQAbee AI

- **Agent** — Automatically tests your website, built with Next.js and .NET, powered by **MCP servers**, **local** and **cloud-based** LLMs *(Ollama, OpenAI)*

myQAbee

- **Platform** — Focused on automated testing and process automatization, built with React and .NET, powered by **MCP servers** and **Skills**

Bridgehead

- **AI Assistant** — Medical documents system, including a chatbot feature, built with Next.js and .NET

Petrol IoT

- Displaying real-time sensor data with Next.js

Petrol Market Access

- Real-time electricity stock market platform built with Next.js

Service Now

- SaaS platform that automates processes within an organization

Software Engineer — Cubic Motion DSP

Sep 2022 – July 2024

Video Player Core

- Unified two separate libraries into a single codebase
- Refactored and reorganized 2 years of legacy code, extracting common logic into shared modules
- Replaced Babel, Rollup, and Webpack with Vite
- Migrated the codebase from JavaScript to TypeScript

React Component Library

- Implemented reusable components used across multiple projects, improving UI consistency and reducing development time

React Video Player

- Set up project architecture and implemented complex timeline logic

Unified Video

- Worked with multiple concurrent video player instances
- Implemented features leveraging video data

Daily collaboration with international designers and developers; responsibilities included code reviews, project integration, and planning.

Full Stack Developer — Spremi Ispit *(Personal Project)*

Educational platform providing students with unrestricted access to learning resources. Currently serves 2,000+ students across three faculties at the University of Niš, with ongoing expansion university-wide.

I designed the entire system:

- Backend structure
- Frontend structure
- Entities
- Database schema
- APIs
- Setup a VPS hosting
- Defined app deployment through Github Actions
- Create documentation about running the app in both local and hosting environments, with or without Docker.

*Please check out **spremiispit.com***

Other Projects

AI

Sign Language Communication System — Translates sign language to speech and vice versa. *(Python, CV2)*

Text Summarization with AI — Scraped and summarized 500 news articles in Serbian and English. *(JavaScript, Python, Puppeteer, HuggingFace, spaCy, NLTK)*

Generative AI Video Tagging System — AI model that curates unstructured video data, tagging and categorizing it into a searchable database with a user-friendly retrieval interface.

Video Super Resolution — Generates high-resolution video from low-resolution input using super-resolution AI models.

Web

Taxi Dash — Collects car sensor data to monitor vehicle and driver performance. *(React, TypeScript, MQTT)*

Social Network Bots — Automated posting on Instagram and Facebook to drive sales for a personal business. *(Puppeteer)*

Product Sales Tracker — Full-stack client application for tracking product sales. *(React, PHP/CodeIgniter, MySQL)*

Boiler Service — Client-facing web application to showcase services.

Mobile

Cryptocurrency Wallet — Mobile wallet application. *(React Native)*

VR

Hoops VR — Virtual reality basketball game. *(Babylon.js)*

Languages

- **Serbian** — Native
- **English** — Proficient
- **Romanian** — Basic
